*date:* April 6, 2007  
*to:* Distribution  
*subject:* Safety Walk  
*from:* P. Cirnigliaro

On April 2, 2007 a Job Risk Analysis (JRA-3-07) and a Safety Walk through of a routine manual material-handling job was performed. The actual task was to transfer cut cable from a Sealand container to a waste bin. The cables included 535 MCM, which were cut into approximately six-foot lengths, and weighed approximately 15 pounds each. The Workers carried two cables each for a distance of twenty feet for the entire day.

Safety Walk Attendees:

C. Bloxin (CA FES Group)  
M. Celgia (CA FES Group)  
P.Cirnigliaro (C-A ESHQ)  
R. Karl (CA FES Group)  
S. Pontieri (CA FES Group)

Positive Observations:

- Use of PPE, including gloves and safety shoes.
- An appropriate number of workers were employed to keep the physical stress of the job to a minimum.

Negative Observations:

- None

Distribution: Safety Walk Attendees
